Annual Report

Placement cell is very important cell of institute. Placement is very important issue. Our institute runs B.A. and B.Sc. programs in B.A. Stream history, Marathi, Hindi, sociology, Geography are specialized subjects for the B.Sc. student we run Chemistry as a special subject. During academic year we guide the students for the different competitive exams. We are regularly in touch with the non government organizations, Private Limited companies and their management. We also organize debates, seminars, workshops for the student. We try to give skill based education to the student from our B.Sc. stream students. As we run B.Sc. Chemistry program in Faculty of science so most of the students get job in different chemical Pharmaceutical and fertilizer Industries after completion of their graduation in chemistry. So we motivate the students in that direction in order to get the job opportunity immediately after the completion of the B.Sc. Chemistry course, for that we motivate the students by organizing the lectures, seminars and giving them information about the situation in the market. It helps to students to find out their jobs. As a result nearly 20 to 25 students selected in different organizations.
